4. HOW COCKROACHES ARE KILLED

Enemies

Humans will try almost anything to rid their homes of cockroaches. Before there were modern insecticides, people used the cockroach's few natural enemies against them.

Centipedes

Hedgehogs

Geckos

Spiders

An effective kind of insecticide used was DDT. Dichloro Diphenyl Trichlorocethane (a toxic compound) was used for many years before being branded as a harmful substance.

1946 Advertising Postal Card - "Publibel" No. 702. Coat of Arms issue. Rate: 65 centimes or 65/100 of a franc, Printed by the Belgian Agency of Post, exclusive concessionaire. Profit from the postal card was for the unemployed workers and later for the Social Service of the Belgian Postal Service.
